

Two-part conveyor skirting system prevents dust and spillage; reduces maintenance costs.

Staying InSync With Technology.

The **EZ-SKIRT® Skirting System** is a simple and effective two-part system that prevents dust and spillage. And, only EZ-SKIRT and **Applied Industrial Technologies** can bring it to you. Get to know the world class sealing system that is reducing cleanup and maintenance costs at installations worldwide.

Aggregated Industry

EZ-SKIRT Applications:

- Hoppers
- Chutes
- Conveyors

► Features and Benefits:

□ Simple Two-Part System

Mount the 5-foot stainless steel hangers to the chutewall, insert the skirting "T" lugs into the serrated channels, and adjust the skirting to the belt. Adjusts in seconds by pushing down or tapping with a mallet. **No nuts, bolts, clamps or fasteners.** Quick, easy peel-away removal for maintenance. Sealing strips come in 5-foot lengths with overlapping joints for a tight seal.

□ Easy Installation

Can easily be retrofit to your existing chutewalls. The skirting is available in many sizes, thickness and compounds. Hangers are available in 45, 60, 70, 80 and 90-degree angles for a custom fit to any trough angle to seal your conveyor like no other system.

□ Proven Performance

The sealing strip is high quality press molded rubber that substantially outlasts conventional skirting. From severe duty hard-rock installations to self-adjusting rubber that contours and flexes with the belt to prevent dust leakage, EZ-SKIRT provides simple and effective sealing.

EZ-SKIRT® Skirting System is SIMPLE, QUICK and EFFECTIVE.

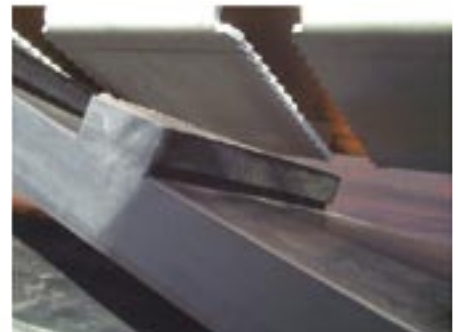

The **EZ-SKIRT Skirting System** was developed in the tough hard-rock mining conditions of the Minnesota Iron Range. Plant managers and maintenance personnel alike are finding that the **EZ-SKIRT Skirting System** provides the quickest return on investment for their conveyor system.

Stitch weld hanger to hopper (45° shown)

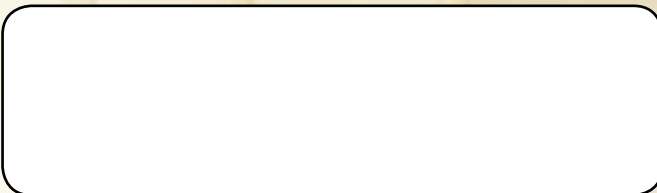

Easy peel-away removal

Serrated channels hold skirting securely—skirting will not creep back up
