

Grounds & Maintenance De-Icer/ Ice Preventative from Liquid Heat™

InSync

Staying InSync With Technology.

*Liquid Heat GREEN is most effective as an ice-preventative. Its special formula works to keep ice, snow and frozen material from bonding to surfaces. With Liquid Heat GREEN it's easy to eliminate ice buildup before it begins. Let **Applied Industrial Technologies** make an immediate impact on your wintertime productivity and safety with Liquid Heat GREEN.*

InSync with Technology

LIQUID HEAT GREEN

Is Available in :

- ▶ **5 Gallon Pails**
Part Number LH005
- ▶ **55 Gallon Drums**
Part Number LH055

*Be proactive and consistent with ice prevention and use Zircon's **Liquid Heat GREEN**. Its special blend of chemicals suppresses the freeze point to work effectively at low temperatures – with no need to repeat applications.*

Testimonials

"The products we used in the past were ineffective once we reached single digit temperatures. Liquid Heat not only worked in these conditions, but it also removed the icy buildup left behind by other products."

Pennsylvania

"Liquid Heat works great, even in very cold weather (-10° to -15° F) when other de-icers start to gel."

Ohio

"Very useful in 0° or lower temperatures. Liquid Heat removed ice and frozen buildup immediately."

Montana

Application Instructions:

Spray on in streams 4 inches apart. Product will spread out upon application.
