

# One trusted source for all your lubricant needs

Reduce lubricant usage and maintenance costs with the **Molykote®** line of High Performance Industrial Lubricants from Dow Corning. This family of products, ideally suited for the Food Industry, is formulated from a high purity level of base stock, meeting specifications over a wide range of temperatures and applications. It's just one more product that **Applied Industrial Technologies** offers to keep you **InSync®** with peak performance, extended service life and reduced inventory requirements.

Food Industry

## Molykote® meets virtually every plant maintenance requirement imaginable

- **General food processing**
- **Poultry and bakery processing**
- **All applications that require oil lubrication and may have an opportunity for incidental food contact**

### ► Features and Benefits:

- Molykote mineral oils are produced in a patented hydrocracking process that significantly reduces contaminants that cause premature lubrication failure
- Molykote synthetic oils are formulated with additives that enhance performance and reduce impurities
- The Molykote line addresses a variety of applications and covers a wide range of temperatures thereby reducing inventory requirements
- Molykote products conform to both USDA H-1 (incidental food contact) and H-2 (no food contact) designations

**APPLIED**  
Industrial Technologies®

Value Through Innovation

# Applied keeps the Food Industry InSync® with peak performance and reduced maintenance costs

## Molykote® Gearbox / Chain Lubricants

- Help prevent wear and process interruptions through greater resistance to oxidation and stable performance at high temperatures and under high loads
- Available in mineral base and synthetic blends in both 5-gallon pails and 55-gallon drums

## Molykote Compressor / Vacuum Pump Lubricants

- Formulated to meet or exceed the performance of all comparable OEM fill products
- Available in synthetic oils and blends in both 5-gallon pails and 55-gallon drums

## Molykote Hydraulic Lubricants

- High purity of base fluids minimizes the formation of emulsions in contact with water
- Available for use in systems designed for low pour point or high flash point mineral oils
- Available in mineral oils and synthetic blends in both 5-gallon pails and 55-gallon drums

## Molykote Multipurpose Lubricants

- Provide protection for a wide range of moving components in industrial systems
- Available in mineral oils in both 5-gallon pails and 55-gallon drums

Molykote products conform to both USDA H-1 and H-2 designations and are available in a wide variety of ISO grades. Contact your local Applied service center about H-2 rated products.

### H-1 RATED MOLYKOTE PRODUCTS

MA Part #	Mfg Part #	Product Description	ISO Grade
<b>Hydraulic Oils</b>
